Sirs,

As always, SMPD appreciates your willingness to assist. We have all worked diligently to develop and maintain a great working (and personal) relationship. It is times like these that our communities benefit from our ability to collaborate.

Please see attached Search and Arrest Warrants. The judge signed the warrants on 12/23/2024.

There are three residences and three suspects involved in this investigation. For investigative purposes, investigators would like two warrants served simultaneously (the third will trail, SMPD will handle). SMPD is requested SBSO SED assist by serving a warrant at 2995 Associated Rd, Casmalia, Ca 93429. The warrants are mid-high risk per our matrix (attached for your reference).

If SBSO is available and willing to assist, our hope is to simultaneously serve the warrants early Friday (12/27) morning. Obviously, this is a quick turnaround, so our timeline can be adjusted if necessary. Once we have your Administration's official approval, we can hammer out details (timeline, surveillance, etc). The service will be based on surveillance locating the primary suspect at one of SMPD's service locations.; therefore, we will need to be in frequent communication leading up to the service.

Quick summary for your warrant service location:

2995 Associated Rd, Casmalia, Ca 93429 is a single family residence located on a 54 acre rural property. There are multiple dwellings on the property located on a one-way-in, one-way-out style road. The residence appears to have surveillance cameras, and is set on a long driveway, behind an oil pipe fence and gate to the front of the residence. Cell phone evidence indicates that the suspects went to 2995 Associated Road after the homicide. It is believed that this is a "stash house," and where evidence, including the AR-15 rifle, is likely located. The residence belongs to a brother of Jesus Lopez-Ramirez (driver during the homicide).

Please reach out with any questions. Please advise once your Administration has approved the assist.

Thank you,

Nate
